

# Our people need jobs, but our leaders fund war.

FORTY STATES in the US today are in fiscal crisis. We must demand that our Congressional representatives vote against any further war spending and that they become leaders in the Congress on this important issue!

Sign our petition below to push the U.S. House of Representatives to stop funding war profiteers and start investing in our future. We urge them to vote NO on any further war funding appropriations for Iraq and Afghanistan, whether they are voting in the FY2011 budget or in "supplemental" bills, in order to redirect the nation's resources toward improving our education system, infrastructure, and healthcare programs.
