

BP Oil spill disaster is now the largest in US History

Estimations of oil spill size:

Gallons of oil in a barrel: 42 // in a drum: 55
Daily Estimate: BP original statement: 5k Barrels
- Closed Door estimate: 60k Barrels Daily
- Gov't Audited Adjusted Estimate: 20k - 840k

Average number of days an oiled seabird survives in the wild after cleaning and release: 6

Days in 1970 north Alaska was cold enough to operate oil-drilling machinery w/o damaging tundra: 213
Days in 2002 that it was cold enough: 106

Revenue from Iraqi oil sales that the CPA could not account for, according to a 2005 audit: \$8,800,000,000

Fair price of a barrel of oil, according to Osama bin Laden in 1998: \$144
Date on which oil reached \$144 a barrel: 7/2/08

Year that BP was the #1 distributor of oil to the Pentagon/Us Military: 2009 (Newsweek)

Amount BP was fined after a 2005 refinery explosion which resulted in 15 deaths: \$50 million (Newsweek)

Largest amount BP will have to pay in fines under current legislation: \$75 million

Projected cost of actual cleanup: \$33 million (for each day the spill continues--Telegraph UK)

Amount per day that BP makes in revenue since Gulf Oilspill began: \$3.9 million (Newsweek)

of oil spills are reported each year to the federal government: Approximately 20000 (EPA)

The list goes ON and ON! BP must Pay! NO More Offshore Drilling!

Today we are bringing our outrage to BP's doorstep, denouncing this criminal company that ignored crucial safety issues, cut corners, and spent millions lobbying Congress to fight regulations. **BP has a sordid history of recklessly pursuing enormous profits at the expense of workers' lives and the environment, and it's got to stop.**

We want our government to stop protecting BP and instead protect the fishermen, the coastal residents and the wildlife. We want legislation like the Big Oil Bailout Prevention Act which would have spiked the maximum liability for oil companies from a pitiful \$75 million to \$10 billion-making sure that BP paid for this man-made catastrophe, to pass!

Let's create the world we want to see—shifting our personal lives and national energy priorities to clean, renewable resources!
